What Is Being Done?

The Michigan Department of Transportation (MDOT) is rebuilding the I-94 interchange at Main Street in the village of Mattawan. Roundabouts will be built on both sides of the existing bridge.

When Will This Be Done?

Work is scheduled to start in April, and all lanes are expected to reopen in October.

How Will Traffic Be Affected?

Traffic will be maintained with a combination of daytime flag control, traffic shifts, and ramp detours. A temporary signal will be in effect on the south side of the I-94/Main Street interchange.

During construction, only one ramp will be closed at a time:

- **Westbound I-94 exit ramp:**
Exit at 9th St/Oshtemo (Exit 72) and follow the posted detour. Trucks over 13' 6" must exit I-94 at M-40/Paw Paw (Exit 60) and follow that posted detour.
- **Eastbound I-94 exit ramp:**
Exit at M-40/Paw Paw (Exit 60) and follow the posted detour.
- **Eastbound and westbound I-94 entrance ramps:**
Go north on Main Street to Red Arrow Highway and follow the posted detour for each direction.

Nearby Cole Avenue also will be closed with a posted detour.

Long-term Benefits

The interchange improvements will increase efficiency and improve safety for all motorists driving through the interchange.

MDOT's 2011 road and bridge program supports the creation of jobs, growth of the economy, preservation of the environment and the safety and security of the transportation system.
